Great interest in creating **complex and high performance** systems. Experienced in the use of **Python** and **C++**, and can deal with big projects. For example, I have built REST API's with the use of AWS (**Amazon Web Services**) and Python, which were then used by an **Android app** that I also created. I can help develop good products if set with a good team. Self-motivated.

Education

Bachelor's degree in Computer Engineering, *Tecnológico de Costa Rica, In Progress (70% completed)*

Some relevant completed courses:

- **Object Oriented Programming**
- **Databases** (I, & II)
- **Software Requirements**
- **Computer Architecture**
- *Data Structures*
- *Algorithm Analysis*
- *All math related courses (Statistics, Operations Research, Calculus, etc.)*

Languages:

- *Spanish (native)*
 - **English** (Fluent, Proficient)
 - *Test of English for International Communication (TOEIC) 2014, (985/990)*
 - *Four English courses at Tecnológico de Costa Rica as part of curriculum*
 - *English focused high school: Liceo Experimental Bilingüe, La Trinidad, 2014*
-

Skills

- **Great with: C, C++, Python**
- Good with: **JavaScript**
- Good at using Git source control system.
- Full Stack.
- Excellent at learning new technologies and tools.
- Driven to create good products.
- Great at working with a team.
- Prefers **remote work**.
- Described by professors as a great student with lots of potential.
