SKILLS

JavaScript, C#
jQuery, SQL, HTML5
Python, Java, C, C++

Quick at learning
Good at working in teams
Creative thinker
Native Spanish, fluent English
Microsoft Office

OTHER

Have developed Android apps

ABOUT ME

Always ready to help solve problems that may come up. I work carefully and with the intention of developing products skillfully. Highly invested in programming, computers, and technology topics, and want to learn more.

WORK EXPERIENCE

Full-Stack Software Developer at RegionalSoft

September 2021 - August 2022 (11 months)

- **Full-Stack**: the projects that I was assigned required delivery of:
  - Front-end: UI/UX, **HTML, CSS, JavaScript, jQuery, Bootstrap**
  - Business-logic: **C#**, ASP. NET MVC
  - Database: **MS SQL Server**: write stored procedures, optimize queries, create indexes, perform manual queries and updates for in-the-moment emergencies in the production database.
- Implemented complex features on intricate older pages utilized daily by thousands of users. Example: add products through barcode scanning on the critical Point-Of-Sale page.
- Daily usage of: Git, Azure Devops (CI/CD, Wiki, Boards, Repos), Visual Studio, Chrome DevTools
- Worked by myself on projects (as assigned), but collaborated with coworkers when needed (in the shared office or through MS Teams)

EDUCATION

Studying at Tecnológico de Costa Rica
for a Bachelor's degree in Computer Engineering

2015, in progress (70% completed)

Some relevant completed courses:

Databases I & II	Algorithm analysis
Software requirements	Object Oriented Programming
Data structures	Computer architecture
